

## Python Backend Developer (m/w/d)

### Description

We are a long-standing successful IT consulting and software company and established with well-known customers. We are the experts for data, networks, infrastructures and digital project solutions.

We create complete solutions in digitalization for medium-sized companies and corporations.

Based on the knowledge of our employees and a solid business process and technology know-how, we support our customers in the transformation processes in digitization.

In addition, we help to make the daily operations successful through our remote cloud service.

WORK REMOTE FROM YOUR HOME OFFICE or come to our modern offices in Düsseldorf.

### Responsibilities / Main tasks

- Design and develop microservices (like Event Driven, RESTful API) according to given specifications of our customers together with your Scrum Team
- You will ensure that the developed software meets the highest quality standards through code reviews and unit tests

### Qualifications / Requirements

- Proven practical experience in Python development with Django, Flask or FastAPI
- Completed IT education, an IT degree, or a related qualification

### Employment benefits

- Work fully flexible in home office, or in our offices in Düsseldorf
- Good remuneration according to the responsibility of the task
- Employer financed company pension scheme
- Internal know how exchange program through regular inside sessions
- Free coffee, tea and water snacks in the offices
- Good working atmosphere
